3. INSTRUCTION FOR SAFE USE

Working limits. The product should be used as per its direct purpose.

Product preparation for usage. The product should be installed taking into account all the requirements in accordance with this document and other documents needed for installation (in case such documents are the part of a set). The general view of the product is presented at picture 1.

Product assembly and installation procedure. The product is transported assembled. The assembly scheme is presented at picture №2.

Instructions:

- 1) Dig two holes in the ground at the distance of 12 meters (depends on the width of the playing ground) at the center line of playground in accordance with the side lines of this playground (the sizes of the holes are indicated at picture 2).
- 2) Install foundations in the holes (apart from racks).
- 3) Flatten the depth of the hole adding rubbles and making the holes deeper in accordance with picture 2.
- 4) Install the foundations using the lever in two places and fill the hole with concrete of B15 brand of a small fraction (as it is shown at picture 2).
- 5) The foundation can be used in two weeks (after the concrete is fully fixed) according to its direct purpose. Racks are installed in foundations and the net is strained between them.
- 6) Cover the holes with foundation with caps in case the racks are uninstalled for some time from playground to avoid collecting rubbish in the holes.

WARNING! QUANTITY, BRAND AND THE TERMS OF CONCRETE FIXING NORMS VIOLATION LEADS TO WRONG PRODUCT INSTALLATION AND ITS OPERATING AS A RESULT OF IT. RESPONSIBILITY FOR KEEPING TO INSTALLATION NORMS OF THE PRODUCT IS LAID ON THE CUSTOMER.

4. TECHNICAL MAINTENANCE

Technical maintenance presumes, first of all, the responsibility of the user to stick to all recommendations, that are mentioned in this document, beginning with every-day observation of the product and its technical order.

Before operating the product, conduct a visual inspection, check the fasteners and structural strength – in case of any damages, full or partial down state the product is forbidden to be used.

5. INFORMATION ON STORAGE, TRANSPORT AND DISPOSAL

Product storage and disposal orders. *WARNING!* The product is aimed to regular using according to its purpose (taking into account all the limits, that are mentioned in this document) after its installation. It is not recommended to leave the product without using (more than 30 calendar days). External (physical) factors can lead to losing the shop-front of the product (or its parts), wrong working on the product or its parts during a long-time down time, and as a result it might lead to breakage of the product.

If long-term storage of the product is required, the following storage rules must be observed (the list of conditions is not complete):

- place the product in a closed dry room with natural ventilation;
- protect the product from external factors (dust, water drops, etc.) with a large plastic bag, leaving space for free air circulation;

- take other measures to preserve the appearance and characteristics of the product during storage.
- When removing the product from storage and preparing for installation, follow the next recommendations:
- remove the product from the packaging material (polyethylene, cardboard, other packaging materials);
 - remove dust and other contaminants from the surface of the product;
 - check completeness and absence of parts damage.

The product is transported unassembled in carton packing. Transporting should be accomplished by the way of protecting the product from external factors (rain, snow, sun-rays, water, moisture, etc.)

After the term of product use is over the Customer determine its further usage by themselves.
